

I. Rational Expression (p.447):

a fraction (ratio) between two polynomials; anytime the denominator is zero, the expression is “undefined”

II. Examples (p.453): Problems #8,10,12

III. Simplifying: $\frac{ac}{bc} = \frac{a}{b}$

IV. Examples (pp.453-455): Problems #18-56(even), 72

HW: pp.453-456 / Problems #1-55(odd),61-67(odd)
71,75

Read pp.459-463 (section 7.2)
