Accelerate to Success!

Math Non-STEM Acceleration

Math STEM Acceleration

English Reading Acceleration

English Writing Acceleration

The University of Hawai‘i Community College System has recently redesigned its models for offering developmental courses in English and Math.

These new models will provide an opportunity for students to accelerate through the progression of English reading, writing, and math.

Achieving college level (100+) courses in these areas are a huge step forward in any student’s academic success. These fundamental courses provide a solid basis which will support students for success throughout their academic program.

Contact the Counseling Office at (808) 934-2720 (Hilo) or (808) 969-8816 (Palamanui) for more information.

*Although new qualifiers may place a student into higher level courses, work with your counselor or faculty advisor to determine your most appropriate placement level.

Registration for Fall 2016 classes begins the week of April 11th.

New English and Math Placement Qualifiers*
