The GECTT recommends the following 44 courses be considered for the first round of REVIEW for potential certification for AA and AS degrees, unless otherwise noted as AAS. The committee attempted to target high demand, transfer level courses that would likely meet the descriptors of a GELO. These recommendations made by the GECTT do not guarantee certification.

1. Documentation to be submitted with request for certification:

A request for certification will require a complete course outline (using the CRC course outline template). Members of the GECTT are willing to assist disciplines with course outline enhancement upon request, please notify J. Savage (Chair GECTT) if assistance is desired. It is expected that revisions to current course outlines will be made for the majority of the courses listed above; the GECTT made a request to the VCAA that enhancements to the course outlines (no change to content) be fast-tracked and not require CRC approval. This request is pending.

The GECTT is will be meeting on November 29, December 6, and December 13 to discuss and refine additional attachments that will be submitted with the request for certification. Information will be shared with DC’s as soon as these attachments are ready.

2. Deadlines:

The GECTT will accept requests for certification on or subsequent to Jan 10, 2012 through two weeks prior to the April Academic Senate Executive Committee meeting.
