**For the purposes of the Annual Report, Job Placement Rate is defined as the percentage of students who are employed in the year following completion of a CTE (career-technical education) certificate or degree program. (This means that the denominator for the 2021-2022 job placement rate will be the number of students who completed the program in 2020-2021.) Report only those programs with a minimum of 10 students in the completion year. For example, if a program had 9 students complete in 2020-2021, you do not need to report a job placement rate for 2021-2022. Report only those programs for which reliable data are available. If your institution has defined its job placement rate differently than what is described above, you may complete this question using your local definition provided that you describe this definition in Question 19.**

Our institution has programs that meet these conditions.

**20. Please use this text box to provide any comments regarding the data submitted in this report (optional, no limit).**

For 2022-23, the ISS floor and aspirational values were updated.

Re: Questions 5 & 6. The data for this question was provided by the UHCC System which applied different script criterion/filters in generating data when compared to past reports. Thus, comparisons for this report to prior year reports for this metric will differ for previous reporting years.

Re: Question 17c. For FY 2022-23, the drastic drop in transfers is the result of a new script and definition being applied to data for this standard.

Re: Question 18. The pass rates are based upon the calendar year totals. As such, data submitted for 2022-23 reflects the 2023 calendar year.
